ImpressCMS (www.impresscms.org) has published stable releases for both branches of ImpressCMS Â - the 1.2 Â LTS Â branch (for long term support) and the 1.3 branch - Â suitable for use on live sites. Â **Everyone is advised to update to one of these latest versions - they contain security updates that will protect your sites from malicious attacks.** Â

Both releases provide updates to some of the external libraries used (jQuery, TCPDF, PHPMailer, PHPOpenID, just to name a few). They both also have improvements to consistently handling passwords and filtering user-supplied data. For a list of what has been updated, visit Assembla.com and review the milestone information for each - Â 1.2.7 Milestone Â and Â 1.3.1 Milestone Several Â vulnerabilities Â were reported by High-Tech Bridge that existed in earlier versions of ImpressCMS. They have validated these releases remove those vulnerabilities. Download 1.3.1 Final 1.3.1 Final Full Release (zip package, Â tar.gz package)   Additonal downloads are available for other situations - Â all 1.3.1 downloads Â Download 1.2.7 Â Final 1.2.7 Final Full Release (zip package, Â tar.gz package)   Additonal downloads are available for other situations - Â all 1.2.7 downloads Â Â Â
