AMS 3.00 is a major release, specifically targeted to improve Search Engine Optimization (SEO) in AMS, so the article published in AMS may rank higher in search engines and improve relevancy. AMS 3.00 incorporates a flexible and powerful SEF (Search Engine Friendly) URL, allowing the webmaster to customize the article URL. AMS is a highly modified version of News 1.2 for XOOPSÂ and ImpressCMS, adding features to give the webmasters a lot more control over their content while still maintaining an easy to understand and use interface. AMS is highly scalable, geared towards performance, is well suited to large article repositories that attract high amounts of users.

CMSÂ Compatibility XOOPS 2.0.x   XOOPS 2.2.x   XOOPS 2.3.x   XOOPS 2.4.x   ImpressCMS 1.2.x   XOOPSCUBE 2.2.x Legacy **New Features in AMSÂ 3.00** Friendly URL   Add POST NEW ARTICLE at admin menu (manage article)   Add POST NEW ARTICLE at main article page **Enhancements** Update backend.php (RSS) to becompatible with XOOPS 2.x.x, ImpressCMS 1.2.x, XOOPSCube Legacy 2.2.x   Automatic clear the template cache when editing spotlight block or enabling SEF   Support new WYSIWYG editors by simply updating AMS module   Add default audience permission to all users   Add default topic permission for approval (admin only) and submission (admin + user)   File upload (mime type) permission now can be changed in AMS adminstration preference **Author's Website**:Â NovaSmart Technology **Complete Release Article**: AMSÂ 3.00 Final Released Download AMS 3.00
