XOOPS 2.4.5 is a minor update to the XOOPS 2.4 platform, focusing on bugfixes and cosmetic changes to the underlying code. There are [detailed instructions](#) to follow if you are using earlier versions of the xoopseditors - be sure to read and follow them. Please remember: If you're installing it over previous installation, make a BACKUP of your files and database first! Also note that some hacks done for previous XOOPS versions might not work with this release: testing before installing is always a good practice.

System requirements

PHP:

Any PHP version ≥ 4.3 (PHP 4.2.x may work but is not officially supported, PHP 5.0+ is strongly recommended)

MySQL:

MySQL server 3.23+ (MySQL 5.0+ is strongly recommended)

Web server:

Any server supporting the required PHP version (Apache highly recommended)
