In an update to a widely used module, McDonald (a module developer for ImpressCMS), has [released a stable version of imLinks 1.05](#) . imLinks has a long history, having the old XOOPSÂ module, WF-Links, as its ancestor. This latest update fixes a few bugs and replaces the Multimap option with Bing Maps. This version of imLinks requires ImpressCMS 1.2, or later. It will not work on XOOPS. Â

imLinks can be used in a variety of ways, due to it highly flexible design - you can use it as a directory of related websites or as a business directory. It also integrates features from 2 other modules - Tag and imGlossary. **Changed in 1.05** Fixed: replaced Multimap with Bing Maps Fixed: alphabetical listing using toolbar Fixed: updating link fails for admin Fixed: comment function
Removed: images/icon/multimap.png Updated: Google and Yahoo map icons Â **Download** You can downloadÂ imLinks 1.05Â FinalÂ from [McDonalds Store](#).
