A release addressing a bug fix and adding a few new features has been published for [Impression](#), a module for [ImpressCMS](#) by McDonald. The spotlight block now displays categories properly. In addition, the following features have been added: captcha in submit form option to have categories displayed in blocks a 'bytes more' option for the footer The 'bytes more' option will indicate the length of the remaining text when viewing the index (summary) page. You can select to display nothing, the bytes remaining, characters remaining, or words remaining.

Impression is a simple article module based on the module imLinks (WF-Links).

It's easy to use and has only a few basic features, see below.

Features

Supports WYSIWYG editors: TinyMCE, FCKeditor, Tinyeditor Can create categories and sub-categories Categories can be set invisible in blocks Articles can be assigned to multiple categories Group permissions can be set per category Articles can be cloned Articles can be commented Articles can be printed PDF output of articles Articles can be recommend thru email Articles can be set offline Publication date and time can be set Spotlight block Headlines block RSS feed, fully configureable from administration Tags can be assigned when the module Xoops Tag is installed Tag blocks Captcha in submit form Social Bookmark option Prune function Pagination (page break) Nice urls Waiting plugin Words can be linked to [imGlossary](#) entries automatically **Download** You can download Impression 1.0.2 Final from [McDonalds Store](#). **Requirements** Impression 1.02 needs ImpressCMS 1.2, or later
