d3Pipes   [d3Pipes]

d3Pipes is a feed aggregator and publisher module from GiJoe

SUMMARY

- External (offsite) RSS/ATOMs can be displayed with any aggregation
- External RSS/ATOMs can be imported/deleted automatically
- External RSS/ATOMs can be marked/commented
- Internal (onsite) "what's new" information can be displayed with any aggregation
- Information of both internal and external feeds can be treated seamlessly
- Information of both internal and external feeds can be output by the format of RSS1/2/ATOM
- Full customizable "Joint Model"
- Entry extraction
- Asynchronous blocks which never make your site heavy (Of course, clonable)
- As D3 module, free dirname, duplicate, and easy maintenance.

Â

REQUIREMENTS

- Altsys module
- Copy "common/lib" (JavaScript Libraries) under XOOPS_ROOT_PATH
- Be sure smarty plugins (d3comment_*) are copied into class/smarty/plugins/
- Directory XOOPS_TRUST_PATH/cache must exist and be writable
